_____ I certify that I have the legal right to authorize the cremation & control the disposition of the Decedent's remains.

- 1. [REDACTED] INITIAL Cremation Container.** The Crematory will not accept the remains of the Decedent for cremation unless they are in a leak resistant, rigid combustible cremation container or casket. I authorize the Crematory to remove and dispose of handles, ornaments or other non-combustible parts of the cremation container or casket. If the remains arrive at the Crematory in a noncombustible casket or other container, I authorize the Crematory to place the remains in a combustible cremation container and to lawfully dispose of the non-combustible casket or other container in any manner it deems appropriate.
- 2. [REDACTED] INITIAL Mechanical or Radioactive Devices.** Mechanical or radioactive devices, such as pacemakers, may be a hazard if placed in the cremation chamber. The Crematory will therefore not knowingly cremate any remains, which contain such a device.

I certify that the remains of the Decedent

If the decedent's remains do contain such a device, I authorize the Crematory to arrange for the removal of the device prior to the cremation. I further authorize the Crematory or its agent to dispose of any such device as it deems appropriate, unless other instructions are given here:

If any such items are recovered from the cremation chamber I authorize the Crematory to dispose of them.

4. The Cremation Process. I acknowledge the following: The human body burns with the casket, container, or other material in the cremation chamber. Some bone fragments are not combustible at the incineration temperature and, as a result, remain in the cremation chamber. During the cremation, the contents of the chamber may be moved to facilitate incineration. The chamber is composed of ceramic or other material that disintegrates slightly during each cremation and the product of that disintegration is commingled with the cremated remains. Nearly all of the contents of the cremation chamber, consisting of the cremated remains, disintegrated chamber material, and small amounts of residue from previous cremations, are removed together and crushed, pulverized, or ground to facilitate interment or scattering. Some residue remains in the cracks and uneven places of the chamber. Periodically, the accumulation of this residue is removed and interred in a dedicated cemetery property, or scattered at sea.

5. Time of Cremation. The cremation will take place after all required permits are obtained, this completed and signed Authorization is received by the Crematory, and after any scheduled funeral ceremony at which the decedent's body is to be present has been concluded. The Crematory will perform the cremation according to its schedule (unless a specific date and time is requested in section 9), and at its discretion, without obtaining any further authorizations or instructions, unless the right of the person signing this document to authorize the cremation is contested by someone. In that event the Crematory may delay the cremation while it determines whether and how to proceed. The cremation process may take a minimum of 5 working days upon receipt of a signed Death Certificate from doctor. Initials [REDACTED] INITIAL
